Hytera Communications PMRExpo 2022 Stand Guide

Innovation for a Safer World

www.hytera-europe.com

HYTERA AT PMRExpo 2022

Hytera Communications presents a theme on 'Innovation for a Safer World' at this year's PMRExpo 2022, and will demonstrate and showcase a wide portfolio of innovative communication products and solutions that enable organisations and those on the frontline to operate more productively, efficiently, and safely.

With professional, industry-leading technology and innovation capabilities, Hytera is committed to continuous innovation, driving intelligent and integrated communication solutions that so many industries depend on for reliable smart communications.

Discover how Hytera's innovative LTE-PMR Convergence Solutions enables Emergency Services and other industries such as oil & gas, construction, security and commercial enterprises, to achieve more with voice and video services, and high-traffic data transmission.

Hytera will also showcase the latest devices and solutions in Digital Mobile Radio, Push-to-Talk over Cellular (PoC), Body Worn Cameras, Digital Evidence Management, Rapid Deployment solutions, In-Vehicle solutions, and solutions for extending coverage.

PRODUCT HIGHLIGHTS

H Series **NEW PRODUCTS**

HR655 Compact DMR Repeater

Hytera's HR655 is the new generation compact DMR repeater designed to expand the communication range of your DMR radios. It comes in two variants depending on your requirements, a 25W IP54 product suited to indoor installations and a 10W IP67 product suited to outdoor/portable applications. Compact and lightweight, the HR655 can be flexibly mounted to the wall or carried on the back by tailored accessories, uncompromising with on-site installation conditions. HR655 allows the communication connection anywhere you need. It is a top pick for hotels, office buildings, supermarkets, industrial parks, and more.

HM655 and **HM685** DMR Mobile Radios

These new generation entry-level professional DMR mobile radios are designed to provide reliable voice and data communication in both vehicles and desktop installations. They are both compact and easy to install, the HM655 with a convenient remote speaker microphone with a display and the HM685 with an in-built display. These radios are born to be your best partner in transportation, utilities and more.

Business Radios **NEW PRODUCTS**

AP5 and **BP5 Series** Enhanced Two-way Business Radios

The AP5 and BP5 series business radios are the perfect choice for instant, enhanced communications, enabling users to stay operationally productive. The AP5 range is fully analogue, while the BP5 range is both digital and analogue.

Dual-mode Radios **NEW PRODUCT**

PDM680 Rugged MCS Radio

The PDM680 rugged MCS radio is designed to help first responders stay connected and informed anywhere and anytime in critical situations. As a professional rugged radio, the PDM680 delivers reliable mission-critical voice communications, and mission-critical video and data services for those working in the most challenging conditions.

PoC **NEW PRODUCTS**

MNC360 PoC Mobile Radio

The MNC360 is a Push-to-Talk over Cellular (PoC) mobile radio designed for in-vehicle communication. With Hytera's innovative design, it provides reliable, loud & clear service for various field communication scenarios.

PNC560 Smart 5G Handheld Device

Hytera's new PNC560 is designed to keep field workers connected through reliable, secure, and efficient communication in all situations. It takes the best two-way radio for instant voice communication, including group and emergency calls, using all the power of 5G for super-fast data services. A Dual SIM 5G technology makes the PNC560 a market leading choice.

PNC360S PoC Smart Radio

The PNC360S Push-to-Talk over Cellular (PoC) radio simplifies the way to communicate with your teammates. This PoC radio can be operated on the widely available public network to deliver instant communications at the push of a button. It is the best choice for those engaged in supermarkets, hotels, logistics, industrial parks, urban and property management, and more.

Body Cameras **NEW PRODUCTS**

VM690Pro Body Worn Camera

The VM690Pro is an innovative Body-Worn Camera (BWC) with a rotatable lens that can be rotated vertically by up to 216°. The VM690Pro features micro gimbal stabilization (MGS) to capture stable and sharp images during movements and starlight night vision to produce colourful videos even in extremely low light conditions.

VM780MGS Body Worn Camera

The VM780 is a LTE-enabled body worn camera (BWC) that allows law enforcement officers to capture everything that happens during an incident and then share live videos, photos, and audio recordings with the command centre for improved situational awareness.
