Redefine communication boundaries with Hytera HyTalk

3G

Hytera HyTalk push-to-talk (PTT) hosted service gives you coverage that is out of this world

....

Hytera HyTalk

Hytera HyTalk is Hytera's Broadband Push-to-Talk / PoC (Push-to-Talk over Cellular) platform developed using our extensive experience in creating professional telecommunications platforms for over 25 years.

Hytera HyTalk enables all of the features typically found in a professional-grade narrowband trunked radio system over broadband wide area networks. It takes advantage of the higher bandwidth with features not previously possible with traditional radio systems, such as real time HD video streaming.

HyTalk Solution & Device Management Overview

Hytera HyTalk Hosted Communications Solution

Provides wide-area radio coverage over Mobile Networks

Discover the Benefits of the Cloud Based Hytera HyTalk Server

(F)			a A
Collaboration across geographic regions	Instant Group Communications	Emergency Alert	Visible remote assistance
Provide nationwide service through LTE, 3G and Wi-Fi	One-to-many push-to-talk; Multimedia messaging	Instant alert and priority emergency call	Video streaming and hands-free communications

Why Hytera HyTalk?

1. Fully Hosted for zero hassle and no IT overhead, or On Premise for total control over your infrastructure – you decide.

Hytera HyTalk is available as a hosted service, so your devices will work right out of the box, leaving you to focus on your business and not on IT infrastructure. For larger organisations with in-house IT capabilities, the entire Hytera HyTalk software suite can be hosted on the premises for the ultimate level of control over your infrastructure.

2. Get closer to the action with video-based communications

Hytera HyTalk not only provides high quality voice communications with your team, but lets you see them too! One to one video calls, as well as industry leading Push to Video (PTV) group calling adds an extra dimension to your conversations.

3. Always connected, Anywhere in the world

Hytera HyTalk uses the Microsoft Azure cloud to bring you Hytera HyTalk as a completely hosted solution, which will scale as much as you need it to, removing the bottlenecks experienced with traditional communications systems.

4. Capture the truth & effectively communicate – all from one device!

The VM780 body worn camera with Hytera HyTalk is the ultimate package for keeping your team safe and connected. Communicate in real time with the press of a button whilst simultaneously recording events for evidence gathering.

For professionals by professionals – with boundless possibilities!

Hytera HyTalk is designed for the professional communication demands of a variety of vertical industries. It is the perfect choice for professionals who want to communicate without coverage or capacity constraints.

Hytera HyTalk can help overcome Operational challenges

Improve Organisational Efficiency

Reliable communications significantly drives the growth of organisational efficiency. Using equipment such as phones may cause staff to always fall a step behind the situation because of no central platform for group information sharing and history logs reviewing.

Enhance Collaboration

Cross regional collaboration requires communication with wide area coverage that can adapt to multiple types of devices. Staying connected anywhere and anytime is critical. With HyTalk you are able to leverage messaging, audio and video communications.

Presence and Location Awareness

Not knowing the GPS location can waste valuable response time on getting to a team member or someone who is in danger or needs immediate attention. Displaying real-time on-duty status and tracking real-time location matters in organisation management.

Workforce Safety

In complex circumstances, employee safety comes first. They need to be protected and alerted. The sooner an emergency is triggered and found, the quicker the organisation can react.

Shorten Training Cycle

Many tools require a specific training for users to correctly use them. It takes a lot of time to get employee on their job due to necessary training. A user-friendly tool is much welcome in any place for anyone and it lowers the operation cost for enterprises.

Centralized Management

Enterprise is always asking for centralized management. It gets things in order and in control. Given the resources are distributed in different facilities, a centric database, management platform and a solution of remote checking and updating are essential.

Industry Scenarios

Hytera HyTalk provides industry solutions that mitigate the potential communication challenges of its users in a variety of different critical and operational scenarios, enabling and them to successfully meet their demands in real-time.
