Glows green	The battery is fully charged.
Glows orange	The battery is charging, and its level is above 90%.
Flashes red and green alternatively	The battery reaches the end of its service life.

Basic Operations

Connect to the Power Supply
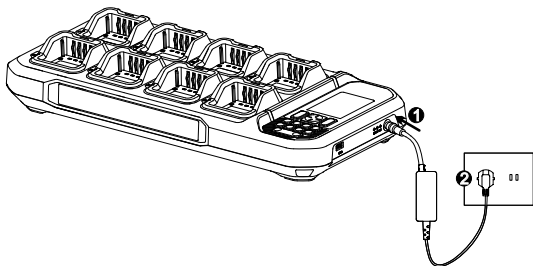

Turn On or Off the Product

- Turn on: connect the product to the power supply, and then toggle the **Power Switch** to the "I" position.

  When the product is turned on, the LCD display shows the power-on animation, and then enters the main interface.
- Turn off: toggle the **Power Switch** to the "O" position.
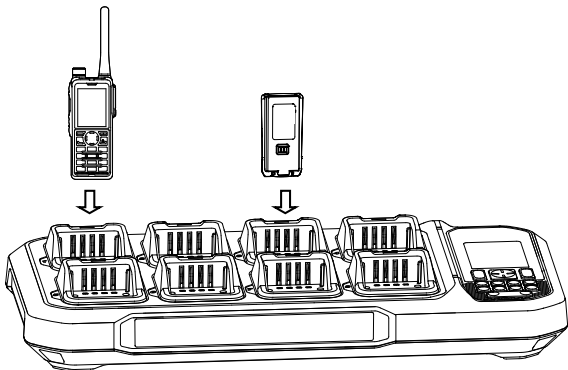

Charge the Battery

⚠ **CAUTION**

Turn off the radio before charging.

Turn on the product, and then insert the battery or the radio with battery attached to the charging slot.

During charging, you can press the numeric key for that slot to view battery information.

Connect to MDM SE

To check battery status and analyze battery data on MDM SE, use a USB data cable to connect the product to your computer where MDM SE is installed.
