Dual stream

Data encryption

OVERVIEW

Hytera Remote Video Speaker Microphone(RVM) VM68X combines a body camera and a remote speaker microphone, which ensures that the evidence captured is accurate and representative of how events actually unfolded. It dramatically improves situational awareness, information gathering and evidence collection in the field.

HIGHLIGHTS

16-MEGAPIXEL ULTRA HD CAMERA

With diagonal 140° wide angle design and 16-megapixel ultra HD camera, VM68X supports 1080p@60FPS full HD video.

180° ROTATABLE CAMERA

The lens of VM68X can be rotated vertically by 180°, which can provide optimal angle of view and flexible wearing positions for the users to capture critical events. Based on preference and scenarios, the users can wear VM68X with the display screen facing in or out.

DATA ENCRYPTION

The VM68X adopts the advanced encryption technology to protect the data security, all the captured evidence (including image, audio, and video) will be protected with AES256 encryption algorithm.

POWERFUL BATTERY LIFE

One battery supports at least 8 hours continuous video recording. With switch button design, it is easy for you to replace the battery anywhere and anytime.

PROFESSIONAL RVM

When connected to a radio, the VM68X can be used as a BT/wired Remote Speaker Microphone to eliminate the needs for officers to carry multiple devices. It can display radio information synchronously, allowing users to operate more conveniently.

DUAL STREAM

The VM68X supports local storage and real-time upload at the same time. In addition, you can set the real-time video resolution according to the actual situation of the network.

DATA COLLECTION AND STORAGE SOLUTION

INTEGRATED DEVICE STATION (IDS)

- Support Batch Data Collection from RVMs automatically
- Query and Replay the Local Data
- Import and Upload the Data to the Cloud (DEM Server) automatically
- Support Role-Based Access Control for Security

DIGITAL EVIDENCE MANAGEMENT (DEM) PLATFORM

- Capable of Processing Massive Data
- Redundancy Backup and Load Balancing Mechanism for Reliability
- Cloud Server for Centralized Storage and Control
- Powerful Search Function to quickly Find Electronic Evidence
- Role-based Access Control and User Authorization for Security

REMOTE SPEAKER MICROPHONE SOLUTION

- Use as a BT/Wired Remote Video Microphone, Eliminating the Need for Officers to Carry Multiple Devices
- Synchronously Display the Information on the Radio for More Convenient Operation
- Transmit the Real Time Video through the Multi-mode Advanced Radio to Realize Visualized Dispatching
